

Frozen-Pipe Checklist

Below-zero night coming? Five things to do before it hits.

1. Find and label the main water shut-off.
2. Open cabinets on exterior walls.
3. Disconnect garden hoses.
4. Keep the heat on when you're away.
5. **If a pipe bursts:** shut off the water, photograph the damage, dry what you can, keep receipts, and report the claim.

When you want to check how your policy handles water damage, we'll go through it with you.
